

Certification Statement

To the Management of Singapore Association of Convention and Exhibition Organisers and Suppliers:

iCompli, a division of BPA Worldwide, was commissioned by the Singapore Association of Convention and Exhibition Organisers and Suppliers (“SACEOS”) to provide independent third party certification of Agility Fairs & Events Logistics Pte Ltd compliance to the Sustainability Guidelines for the Singapore MICE Industry (November 2013) (“the Guidelines”).

About the Sustainability Guidelines for the Singapore MICE Industry

The Guidelines have been developed for both planners and suppliers in the Singapore MICE (meetings, incentive travel, conferences and exhibitions) industry to integrate environmental, social and economic sustainability practices within operations and regular event plans.

Certification Objectives

The objective of the certification process is to provide SACEOS management with an independent opinion on whether Agility Fairs & Events Logistics Pte Ltd satisfies the Freight Forwarder Basic Requirements of the Guidelines.

Certification Approach and Limitations

The iCompli certification team was comprised of a lead assurer who performed the initial assessment of Agility Fairs & Events Logistics Pte Ltd documentation. The process included review of policies, plans, and records to ascertain compliance with the Basic requirements of the Freight Forwarder industry category of the Guidelines. A senior internal supervisor then reviewed the initial assessment and documentation for quality purposes, to determine that the work was performed in accordance with the iCompli protocol and that such work satisfied the Guidelines.

The certification process was limited to a review of the content and assertions within the information and data submitted to document compliance with the Guidelines, and to determine the quality and credibility of the information presented. The certification did not extend to a comprehensive analysis of the accuracy, reliability, completeness and/or consistency of the data, site visits, or the engagement of external stakeholders to arrive at our certification opinion.

Findings and Conclusions

Based on the process and procedures conducted, nothing has come to our attention that causes us to believe that the sustainability policies, records, and actions of Agility Fairs & Events Logistics Pte Ltd are not in accordance with the Basic requirements of the Freight Forwarder industry category of the Guidelines.

The certification of Agility Fairs & Events Logistics Pte Ltd is in compliance with the Guidelines as of February 21, 2019. Any projection of such information to the future is subject to the risk that, because of change, the policies and procedures may no longer portray the conditions in existence at the time of our certification.
